

Statistician to Omicron, a part of Sanos Group

We are looking to expand our team by hiring a skilled statistician with expertise in clinical trials and experience working with R and/or SAS.

Become a part of our highly motivated and close-knit team, fueled by a passion for science, innovation, and making a tangible difference in people's lives. The ideal candidate will bring strong statistical knowledge and practical experience in clinical development and related areas.

Working with us in Omicron, your impact will matter.

Your key roles and responsibilities

Your job as statistician will be highly varied and will amongst other responsibilities include the following:

- Collaborate with Omicron colleagues and sponsors on projects related to clinical development, register-based research, and real-world evidence.
- Provide statistical input to study protocols, clinical development plans, and scientific manuscripts.
- Write statistical analysis plans and other necessary documentation.
- Review and contribute to study reports.
- Participate in the ongoing development of our quality management system and programming setup.
- Program in the R programming language, including developing Shiny applications, R markdown documents, and R packages.

Travel: Limited travel activity is to be expected.

Work location: Telefonvej 8D, 2860 Søborg, Danmark.

Are you up for the job?

Desired skills and experience

- A master's degree in statistics, biostatistics, or a related field.
- Extensive experience and understanding of clinical development, epidemiology, and/or register-based research.
- Proficiency in R and/or SAS programming and experience in its application to clinical trials.
- Knowledge of the CDISC standard for clinical trials

Personal qualifications

- Strong collaboration skills and a positive, proactive mindset.
- You are a responsible person who can work independently and assume accountability of your delegated responsibilities.
- You prioritize making an effort for the working environment and the positive atmosphere among your colleagues - also in more busy periods.

Are we a perfect cultural fit?

Our commitment to you is encapsulated in our promise to every one of our employees saying 'Trust in you – in your development and impact'.

This pledge extends uniformly across all entities within the Sanos Group organization, including Omicron, ensuring that you feel its effects from the very offset of your interaction.

If you are curious about whether you would thrive within the Sanos Group culture and the Sanos Way of Leading, reflect on whether you see yourself working within our principles:

- **Take on** - Responsibility is given, and we inspire you to take it.
- **Try out** - Explore diverse tasks and grow professionally.
- **Team up** - We don't just work together; we thrive together.

What's in it for you?

Here are some of the advantages of working with Omicron:

- **Experience true trust and development** - We are investing in your growth. Committing to you, we don't just offer opportunities. We trust you and give you the freedom to take ownership from day one. Experience rapid personal and career development with specialized training and continuous learning. We are committed to helping you reach your full potential while making a lasting impact on global healthcare and life sciences.
- **Be part of a collegial community** - Work in a place where collaboration is not just a word but a lifestyle. Our team culture is built on trust and teamwork, creating an environment where your ideas are valued, and you work side by side with supportive colleagues from diverse backgrounds. We are not just colleagues. We are a team.
- **Use our flexible Work Arrangements** - Flexible work hours and remote working options are available at positions where this is possible, enabling employees to balance their professional and personal lives more effectively.
- **Pay attention to your physical and mental well-being** - We recognize that a supportive environment is crucial for the overall performance and well-being of our employees. Therefore, we encourage open communication, brain breaks, using your workplace actively, as well as we offer extra support, to the extent that is needed and possible.
- **Insurance benefits** - As part of our salary framework and most important our commitment to our employee's wellbeing, we offer health insurance to ensure you're protected should an unforeseen incident occur.

Ready to Make a Real Impact?

Discover a professional journey like no other. We are small enough to empower every individual yet powerful enough to drive transformative changes in the future of healthcare. We are committed to pushing the boundaries of the world of clinical trials, ultimately accelerating the availability of new treatments for patients in need.

Be a part of our journey and help us pave the way for a healthier future.

Application

We only accept applications sent through the link. We are conducting interviews on a regular basis and will close the position when we find the right candidate.

We look forward to hearing from you.

For further information about the role contact, Klaus Kaae Andersen at klaus.andersen@omicron.dk.

We might use assessments as a part of the recruitment process.

We encourage all qualified candidates to apply for the position – regardless of ethnic background, gender, sexual orientation, disability, religion, or age.

We value your data and take care to protect it. Please see more information regarding privacy for job applicants [here](#).

Introducing Omicron

Omicron is a part of Sanos Group, which is a full circle clinical research and development organization with headquarter in Søborg, near Copenhagen, Denmark. The organization consists of around 200 employees, and is composed of six independent business units, each contributing to the comprehensive clinical research services provided. These units include NBCD, Sanos Clinic, Sanos Supply, Studies&Me, Blueskin, and Omicron.

Omicron is a growing consultancy firm specializing in biostatistics and statistical programming. We are now a team of 10 professionals, based in our office in Søborg close to Copenhagen. Our work spans across clinical development, register-based research, and real-world evidence.
